
Five Looks Three Decisions Framework

Finding Technology Strategic Planning Methodology

I. Look at Industry

1. Industry Value Chain Analysis

Analyze the value chain to identify high-value zones and profit migration trends:

- a. Decompose the industry value chain into segments. Research total market size, average gross margin, and operating margin for each segment. Analyze trends based on historical data.
- b. Visualize value chain migration trends and profit zones using appropriate charts (e.g., trend lines, bar charts).

2. Industry Trend Analysis

Must include technology trends and customer demand evolution:

- a. Customer research: Identify customer attribute transformation trends over a 7-year time span.
- b. Technology roadmap: Map out key technologies in the industry and their development trends over a 7-year horizon.

3. Track Selection

- a. Preliminary selection based on market size, CAGR, average gross margin, and operating margin.
- b. Evaluate industry profitability using Porter's Five Forces model. Assess whether the industry is worth entering. Finalize three alternative tracks.

4. PESTEL Analysis

For each selected track, conduct macro-environmental analysis (Political, Economic, Social, Technological, Environmental, Legal) to identify structural risks and opportunities.

II. Look at Market

Track 1: [Track Name]

-
- a. Market Segmentation: Segment the track based on value orientation and consumption motivation to identify three sub-segments.

Sub-segment 1: [Name]

- 1) Market Size: Calculate TAM (Total Addressable Market), AM (Addressable Market), and TM (Target Market) through industry reports and market research.
- 2) User Persona:
 - a. Demand Analysis: Use VOC (Voice of Customer) and KANO model to identify high-value user needs as input for product design.
 - b. Persona Details: Refine user persona based on application scenarios and VOC analysis.
 - c. Sales Path: Design the distribution channel from product to end user.
- 3) Competitive Analysis:
 - a. Existing Competitors: Identify Top 3 competitors by market share. Analyze their strengths, weaknesses, and market positioning. Conduct SWOT analysis.
 - b. Potential Competitors: Analyze the industry chain to identify potential entrants.
 - c. Strategy: Formulate specific strategies for each competitor.

Sub-segment 2: [Name]

- 1) Market Size: Calculate TAM (Total Addressable Market), AM (Addressable Market), and TM (Target Market) through industry reports and market research.
- 2) User Persona:
 - a. Demand Analysis: Use VOC (Voice of Customer) and KANO model to identify high-value user needs as input for product design.
 - b. Persona Details: Refine user persona based on application scenarios and VOC analysis.
 - c. Sales Path: Design the distribution channel from product to end user.
- 3) Competitive Analysis:
 - a. Existing Competitors: Identify Top 3 competitors by market share. Analyze their strengths, weaknesses, and market positioning. Conduct SWOT analysis.
 - b. Potential Competitors: Analyze the industry chain to identify potential entrants.
 - c. Strategy: Formulate specific strategies for each competitor.

Sub-segment 3: [Name]

- 1) Market Size: Calculate TAM (Total Addressable Market), AM (Addressable Market), and TM (Target Market) through industry reports and market research.
- 2) User Persona:
 - a. Demand Analysis: Use VOC (Voice of Customer) and KANO model to identify high-value user needs as input for product design.

b. Persona Details: Refine user persona based on application scenarios and VOC analysis.

c. Sales Path: Design the distribution channel from product to end user.

3) Competitive Analysis:

a. Existing Competitors: Identify Top 3 competitors by market share. Analyze their strengths, weaknesses, and market positioning. Conduct SWOT analysis.

b. Potential Competitors: Analyze the industry chain to identify potential entrants.

c. Strategy: Formulate specific strategies for each competitor.

Track 2: [Track Name]

a. Market Segmentation: Segment the track based on value orientation and consumption motivation to identify three sub-segments.

Sub-segment 4: [Name]

1) Market Size: Calculate TAM, AM, and TM through industry reports and market research.

2) User Persona:

a. Demand Analysis: Use VOC and KANO model to identify high-value user needs.

b. Persona Details: Refine user persona based on application scenarios.

c. Sales Path: Design the distribution channel.

3) Competitive Analysis:

a. Existing Competitors: Identify Top 3 competitors and conduct SWOT analysis.

b. Potential Competitors: Identify potential entrants.

c. Strategy: Formulate strategies for each competitor.

Sub-segment 5: [Name]

1) Market Size: Calculate TAM, AM, and TM through industry reports and market research.

2) User Persona:

a. Demand Analysis: Use VOC and KANO model to identify high-value user needs.

b. Persona Details: Refine user persona based on application scenarios.

c. Sales Path: Design the distribution channel.

3) Competitive Analysis:

a. Existing Competitors: Identify Top 3 competitors and conduct SWOT analysis.

b. Potential Competitors: Identify potential entrants.

c. Strategy: Formulate strategies for each competitor.

Sub-segment 6: [Name]

1) Market Size: Calculate TAM, AM, and TM through industry reports and market research.

2) User Persona:

-
- a. Demand Analysis: Use VOC and KANO model to identify high-value user needs.
 - b. Persona Details: Refine user persona based on application scenarios.
 - c. Sales Path: Design the distribution channel.
- 3) Competitive Analysis:
- a. Existing Competitors: Identify Top 3 competitors and conduct SWOT analysis.
 - b. Potential Competitors: Identify potential entrants.
 - c. Strategy: Formulate strategies for each competitor.

Track 3: [Track Name]

- a. Market Segmentation: Segment the track based on value orientation and consumption motivation to identify three sub-segments.

Sub-segment 7: [Name]

- 1) Market Size: Calculate TAM, AM, and TM through industry reports and market research.
- 2) User Persona:
 - a. Demand Analysis: Use VOC and KANO model to identify high-value user needs.
 - b. Persona Details: Refine user persona based on application scenarios.
 - c. Sales Path: Design the distribution channel.
- 3) Competitive Analysis:
 - a. Existing Competitors: Identify Top 3 competitors and conduct SWOT analysis.
 - b. Potential Competitors: Identify potential entrants.
 - c. Strategy: Formulate strategies for each competitor.

Sub-segment 8: [Name]

- 1) Market Size: Calculate TAM, AM, and TM through industry reports and market research.
- 2) User Persona:
 - a. Demand Analysis: Use VOC and KANO model to identify high-value user needs.
 - b. Persona Details: Refine user persona based on application scenarios.
 - c. Sales Path: Design the distribution channel.
- 3) Competitive Analysis:
 - a. Existing Competitors: Identify Top 3 competitors and conduct SWOT analysis.
 - b. Potential Competitors: Identify potential entrants.
 - c. Strategy: Formulate strategies for each competitor.

Sub-segment 9: [Name]

- 1) Market Size: Calculate TAM, AM, and TM through industry reports and market research.
- 2) User Persona:

-
- a. Demand Analysis: Use VOC and KANO model to identify high-value user needs.
 - b. Persona Details: Refine user persona based on application scenarios.
 - c. Sales Path: Design the distribution channel.
- 3) Competitive Analysis:
- a. Existing Competitors: Identify Top 3 competitors and conduct SWOT analysis.
 - b. Potential Competitors: Identify potential entrants.
 - c. Strategy: Formulate strategies for each competitor.

III. Look at Ourselves

1. Company Profile

Positioning: Pioneer in smart hardware for outdoor sports.

Vision: make life easy.

Strategic Goal: Become a leader in intelligent outdoor imaging solutions.

2. SWOT Analysis

Analyze company strengths and weaknesses based on Finding Technology's profile:

- Strengths: Technology innovation, supply chain efficiency, agile development.
- Weaknesses: Brand recognition, distribution channels, scale, cash flow.

IV. Strategic Summary

1. Market Consolidation

Summarize the characteristics and recommendations for all nine sub-segments based on industry and market analysis.

2. Business Planning

Design a 3-5 year business plan based on sub-segment characteristics and company strengths/weaknesses:

- Year 1: Launch MVP, validate product-market fit, acquire seed users.
- Year 2: Expand channels (online + offline), iterate product V2.0, achieve X% market share.
- Year 3: Product line extension, market expansion, ecosystem building.
